Basic Introduction

- Generic API format

Generic API format

Request Headers

- certification-code: af92196e-0d07-3c1d-a631-a71c...(Unique credential)

Response

Field name	type	Required	Description
status	string	Yes	Response status description
code	int	Yes	Error Codes
message	string	Yes	Error message
data	object	Yes	Response payload
error	object	Yes	Error details

Success Response Example

```
{
    "status": "success",
    "code": 200,
    "message": "",
    "data": {
        "msg_id": "wamid.HBgLODUyNjg0MTUwMjYVAgARGBIyMUQ4RjA5MTY1NUJERjE3NjYA"
    },
    "error": {}
}
```

Failure Response Example

```
{
    "status": "error",
    "code": 422,
    "message": "The phone number is invalid.",
    "data": {},
    "error": {
        "to": [
            "The phone number is invalid."
```

```
        ]
    }
}
```

Error Codes

Error Code	Error Explanation
200	No error
404	Not found
422	Request parameter error
429	Too many attempts
500	Server error
10001	Certification code is invalid
10002	WhatsApp API error
10003	Viber API error
10004	RCS API error
